The inventions are distinct, each from the other because of the following reasons:

Inventions [I-V], [VI-XII], [XIII-XVI] and XVII-XXI are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions because they are directed to structurally and chemically different products and the products all have different uses. For example, the polynucleotides can be used in hybridization assays, whereas the products of the other groups cannot. The polypeptides can be used to make antibodies and in therapy, whereas the compounds of the other groups cannot. The antibodies can be used in immunoassays, affinity purification etc, whereas the compounds of the other groups cannot.

The methods of groups XXII-XVI and XVII-XXXI are different because each groups uses a different compound and has different steps and end results.

Each group is directed to a single sequence because each sequence is patentably distinct. If applicant disagrees then applicant is requested to show each sequence is related to the other.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Due to the complexity of this restriction, a telephone call was not made to request an oral election to the above restriction requirement.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
